ON BOARD TRAINING RECORD BOOK FOR RATINGS FORMING PART OF A NAVIGATIONAL WATCH AND RATINGS QUALIFYING AS ABLE SEAFARER DECK

SECOND EDITION

Established in 1909, the International Shipping Federation (ISF) is the name used by the International Chamber of Shipping (ICS) when representing maritime employers globally on labour affairs, manpower and training issues. ISF/ICS membership comprises national shipowners' associations from 36 countries. ISF enjoys consultative status with the International Maritime Organization (IMO) and led the representation of maritime employers throughout the revision of the STCW Convention culminating with the Diplomatic Conference, in Manila, in June 2010.

While the advice given in this Book has been developed using the best information currently available, it is intended purely as guidance to be used at the user's own risk. No responsibility is accepted by Maritime International Secretariat Services Limited or by any person, firm, corporation or organisation who or which has been in any way concerned with the furnishing of information or data, the compilation, publication or authorised translation, supply or sale of this guide, for the accuracy of any information or advice given herein or for any omission or for any consequences whatsoever resulting directly or indirectly from compliance with or adoption of guidance contained herein even if caused by failure to exercise reasonable care.

No copying or translation of this book may be made without the express permission of Maritime International Secretariat Services Limited.

The assistance of Stephen E Chapman, FNI is gratefully acknowledged.

ON BOARD TRAINING RECORD BOOK FOR RATINGS FORMING PART OF A NAVIGATIONAL WATCH AND RATINGS QUALIFYING AS ABLE SEAFARER DECK

INTRODUCTION

In 2010, the IMO Convention on Standards of Training, Certification and Watchkeeping for Seafarers (STCW) was revised and updated. This ISF Training Record Book takes full account of these new requirements for ratings forming part of a navigational watch. This Book also addresses the additional competence standards stipulated by IMO for the grade of Able Seafarer Deck.¹

The revised STCW Convention continues to place emphasis on assessment of the outcome of training, i.e. the ability of seafarers to perform their duties competently. In particular, the 2010 Convention requires that a rating's seagoing service must be properly structured and recorded in a training record book approved by the maritime administration responsible for issuing certificates of competence. The footnotes of the amended STCW text specifically refer to ISF training record books as an example of such documentation.

The STCW Code, which contains the detailed requirements of the revised STCW Convention, sets out uniform standards for the attainment of competences in the various maritime skills required to qualify as a watchkeeping rating or an Able Seafarer Deck. The STCW Code also stipulates criteria by which a trainee's attainment of these competences should be assessed by designated on board training officers.

The tasks contained in this Record Book have been carefully designed to help ensure that trainees meet the requirements for certification stipulated by the STCW 'competences'² and that as far as possible the officers supervising their training use evaluation based on Table A-II/4 and Table A-II/5 of the STCW Code. However, the tasks have been arranged with on board training in mind. The training tasks and associated criteria are, in many instances, presented in more detail than in the text of the Convention. This is to help ensure that trainees make the best use of their seagoing service and to help officers supervising trainees make a more objective evaluation of whether they are indeed competent.

Completion of the ISF Training Record Book should provide sufficient documentary evidence that a trainee has completed a properly structured on board training programme and has demonstrated competence in the skills required by the amended STCW Convention in order to be certificated as a rating forming part of a navigational watch and/or as an Able Seafarer Deck.

Note: The certificate issuing administration, which may or may not be the same as the flag of the ship(s) on which on board training is conducted, may determine appropriate training, assessment and certification requirements in addition to the competences and tasks contained in the Record Book. In practice, however, most if not all such requirements will form part of shore based Basic Training (in accordance with Section A-VI/1 of the STCW Code) and Special Training, as applicable (in accordance with Regulation II/4 and II/5).

¹ Formerly known as Able Seaman or AB

² Additional guidance on the competence-based approach to training is given in the 'ISF Guidelines to the IMO STCW Convention, including the 2010 Manila Amendments'

SECTION 1 GUIDE TO COMPLETION

FOR THE ATTENTION OF MASTERS, DESIGNATED ON BOARD TRAINING OFFICERS AND RATING TRAINEES

Object of the Record Book

The purpose of this ISF Record Book is to help ensure that ratings follow a structured programme of training and make best use of their time at sea. In so doing they will gain the practical training and experience necessary to become competent watchkeeping deck ratings, and/or Able Seafarers, in accordance with the STCW Convention as amended in 2010. It is therefore important that this guidance is carefully followed.

On receipt of this Book:

The trainee should complete the information required on the following pages, including details of Basic Training and any Special Training received in accordance with the STCW Convention (page 7). The trainee will then be personally responsible for the safe keeping of this Record Book throughout training.

Section 3, concerning details of mandatory Safety Familiarisation (page 16) and mandatory Shipboard Familiarisation (page 17), should be completed **immediately** after the trainee joins each ship. An officer should sign to signify that mandatory familiarisation as required by the STCW Convention has been undertaken.

As soon as possible after joining each ship:

- The trainee should complete Section 4 (page 19) concerning the technical details of the vessel. The master and the designated training officer on board each ship should provide an opportunity for this exercise to be undertaken.
- The designated on board training officer appointed by the master should inspect this Book in order to check progress already made. A plan should be made to tackle the competences that still need to be demonstrated. A Task Summary Chart can be found in Section 9 (page 65).

Throughout the rating's seagoing service:

- Section 6 and 7, which contain a list of on board training tasks, should be progressively completed. Additional guidance on recording progress is given at the start of Section 5 (page 22).
- The Task Summary Chart in Section 9 (page 65) should also be progressively completed.
- The Book should be submitted to the master for inspection every month and at the end of each voyage. The master's comments should be recorded, dated and stamped (page 13). Comments should only relate to the trainee's competence and practical progress.
- The Book should be submitted to the designated on board training officer on joining each vessel – and then, so far as the voyage pattern allows, every week. Comments should be recorded (page 10).
- A precise record should be kept of the trainee's seagoing service including time spent on bridge watchkeeping duties (page 9).

Important note

The STCW Convention requires that any person conducting on board training shall do so only when it will not adversely affect the normal operation of the ship and time can be dedicated to the training and any evaluation of competence.

SPECIAL TRAINING as applicable in accordance with Regulation II/4 and II/5 of the STCW Convention

This Special Training, if undertaken, may result in a reduction of the minimum required seagoing service that must precede the issue of an STCW certificate for watchkeeping at the support level. Such training is in addition to Basic Training (see below) and as a minimum should normally cover the underpinning knowledge required to perform competences contained in Section A-II/4 of the STCW Code (see Section 6 of this Book). If uncertain, your company should be able to advise you of the seagoing service required.

SECTION 3 MANDATORY SAFETY AND SHIPBOARD FAMILIARISATION

SAFETY FAMILIARISATION as required by Section A-VI/1 paragraph 1 of the STCW Code

Before being assigned to shipboard duties all seafarers must receive basic safety familiarisation to know what to do in an emergency. The master or responsible officer on each ship should sign and date below to signify that you have received training or instruction to be able to carry out the following tasks or duties.

Ship's Name			
Task/Duty	Officer's Initials/Date	Officer's Initials/Date	Officer's Initials/Date
Be able to: Communicate with other persons on board on elementary safety matters			
Understand safety information symbols, signs and alarm signals			
Know what to do if: A person falls overboard Fire or smoke is detected The fire or abandon ship alarm is sounded			
Be able to: Identify muster and embarkation stations and emergency escape routes			
Locate and don life jackets and survival suits			
Raise the alarm and have a basic knowledge of the use of portable fire extinguishers			
Take immediate action upon encountering an accident or other medical emergency before seeking further medical assistance on board			
Close and open the fire, weathertight and watertight doors fitted in the particular ship, other than those for hull openings			

SHIPBOARD FAMILIARISATION as required by Regulation I/14 of the STCW Convention

You will be given a period of time during which you will have an opportunity to become acquainted with the equipment you will be using, and specific watchkeeping, safety, environmental and emergency procedures and arrangements required to perform your duties. The location of safety and emergency equipment varies from ship to ship. To be sure that you are familiar with your duties and all ship arrangements, installations, equipment procedures and ship characteristics that are relevant to your routine or emergency duties, you must complete the following tasks or duties as soon as possible on joining your ship.

Ship's Name			
Task/Duty	Officer's Initials/Date	Officer's Initials/Date	Officer's Initials/Date
Watchkeeping procedures and arrangements: Visit bridge, look-out post, forecastle, poopdeck, main deck and other work areas			
Get acquainted with steering controls, telephones, telegraphs and other bridge equipment and displays			
Activate, under supervision, equipment to be used in routine duties			
Safety and emergency procedures: Read and demonstrate an understanding of your Company's Fire and Safety Regulations			
Demonstrate recognition of the alarm signals for: FIRE EMERGENCY ABANDON SHIP			
Locate medical and first aid equipment			
Locate fire fighting equipment: alarm activating points, alarm bells, extinguishers, hydrants, fire axes and hoses			
Locate rocket line throwing apparatus			
Locate distress rockets, flares and other pyrotechnics			
Locate breathing apparatus and firefighter's outfits etc			
Locate EPIRB, SART and walkie-talkie radios			
Locate Emergency Escape Breathing Devices (EEBDs)			
Locate CO ₂ bottle room, and control valves for smothering apparatus in pump rooms, cargo tanks and holds			
Locate and understand the operation of the emergency pump			
Environmental protection: Get acquainted with: The procedure for handling garbage, rubbish and other wastes			
The use of garbage compactor or other equipment as appropriate			

SHIPBOARD FAMILIARISATION as required by Regulation I/14 of the STCW Convention (continued)

Insert Boat and Fire Muster Stations and other details in the appropriate space. Ask the master to sign in the space provided.

SECTION 4 PARTICULARS OF SHIPS

It is an essential feature of your training that you obtain knowledge of the ships on which you serve. To assist you in meeting this important requirement the following particulars are to be recorded during the time spent on each ship.

FIRST SHIP

mv/ss	IMO Number	Call Sign
Dimensions and Capacities	Lifesaving Equipment	Cargo Handling Gear
Length Over All m	Lifeboats (No.)	Derricks/cranes (No. and SWL)..... tonnes
Breadth m	Life-rafts (No.)	Winches (types) tonnes
Depth m	Capacity per boat..... (persons)	Other cargo equipment.....
Summer draft m	Capacity per life-raft..... (persons)	
Summer freeboard m	Lifebuoys (No.)	
Gross tonnage t	Survival Suits (No. / type)	Ballast tanks (No.)
Deadweight..... t	Fire Fighting Equipment	Segregations (No.).....
Light displacement..... t	Fire extinguishers (Number and capacity)	Cargo tanks (No.)
Grain/Liquid capacity m ³	Types: Water litres	Cargo pumps (No.)
Mooring Ropes (Number/diameter)	Foam litres	Pipelines (sizes).....
Synthetic fibre mm	Dry powder..... kg	Type and rating tonnes/hour
Wires mm	CO ₂ kg	Navigational and Communications Equipment
Towing spring..... mm	Fire hoses (No. and size) mm	Make/type.....
Anchors (Weight)	Breathing apparatus (make).....	Log
Port..... tonnes		EPIRB (No.)
Starboard..... tonnes		
Spare tonnes		
Cable (diam.) mm		
Length..... shackles		

SECOND SHIP

mv/ss	IMO Number	Call Sign

Anchors (Weight)	Breathing apparatus (make).....	Log
Port..... tonnes		EPIRB (No.)
Starboard tonnes		
Spare tonnes		
Cable (diam.) mm		
Length.....shackles		

SECTION 5 INFORMATION ON TRAINING TASKS AND COMPETENCES TO BE ACHIEVED

Sections 6 and 7 of your Record Book give details of the training tasks that you should complete as part of your on board training. **Section 7 should only be completed by trainees seeking to qualify as an Able Seafarer Deck.**

You will see that each page lists the tasks or duties you should undertake. Completion of these will lead to meeting the competences specified by the IMO STCW Convention. A senior officer should review your progress and indicate, with initials and date in the **blue** box on the right hand side of the page, that your performance is considered to meet the *Criteria for Evaluation* and that competence has been demonstrated in that element. The officer may offer advice on areas in which improvement is necessary. The competences required by ratings forming part of a navigational watch as tabulated in the STCW Code are listed below. The Sections are organised as follows:

SECTION 6 COMPETENCES FOR RATINGS FORMING PART OF A NAVIGATIONAL WATCH (STCW CODE TABLE A-II/4)

Navigation at the Support Level

1. Steer the ship and comply with helm orders, also in the English language (page 26)
2. Keep a proper look-out by sight and hearing (page 27)
3. Contribute to monitoring and controlling a safe watch (page 28)
4. Operate emergency equipment and apply emergency procedures (page 32)

SECTION 7 COMPETENCES FOR RATINGS AS ABLE SEAFARER DECK (STCW CODE TABLE A-II/5)

Navigation at the Support Level

5. Contribute to a safe navigational watch (page 35)
6. Contribute to berthing, anchoring and other mooring operations (page 37)

Cargo Handling and Stowage at the Support Level

7. Contribute to handling of cargo and stores (page 40)

Cargo Handling and Stowage at the Support Level – Additional Tasks for Tankers

8. Contribute to handling of cargo and stores (page 42) *NB: This Book covers extra tasks for ratings whose training at sea includes experience on tankers*

Controlling the Operation of the Ship and Care for Persons On Board at the Support Level

9. Contribute to the safe operation of deck equipment and machinery (page 44)
10. Apply occupational health and safety precautions (page 50)
11. Apply precautions and contribute to the prevention of pollution of the marine environment (page 53)
12. Operate survival craft and rescue boats (page 55)

Maintenance and Repair at the Support Level

13. Contribute to shipboard maintenance and repair (page 56)

EXAMPLE OF HOW TO COMPLETE THE LIST OF TRAINING TASKS AND COMPETENCES ACHIEVED

Ref No	Training		Criteria for Evaluation		Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
1.	Competence: Steer the ship and comply with helm orders, also in the English language					
1.1	Use of magnetic and gyro compasses; helm orders and change-over from automatic pilot to hand steering and vice versa		A steady course is steered within acceptable limits having regard to the area of navigation and prevailing sea state. Alterations of course are smooth and controlled. Communications are clear and concise at all times and orders are acknowledged in a seamanlike manner		SC	19/3/11
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Demonstrate a knowledge of various types of compass card	AB	9/2/11	Pay more attention to English language orders AB	CM	10/3/11
.2	Execute helm orders correctly	AB	12/2/11		CM	12/3/11
.3	Demonstrate procedure for handing over the wheel	CM	10/1/11			

- The competence shaded **blue** (in this case 'Steer the ship' etc) is directly taken from the text of the STCW Code.
- The primary task (in this case 'Use of magnetic and gyro compasses' etc) is also taken from the STCW Code. The primary task is sub-divided into training tasks or duties on the left hand side of the page. The trainee should complete as many of these training tasks as possible. However, in view of the likely equipment cargo or voyage pattern of the ship, **it is not expected that all these tasks will be completed before the trainee is considered competent in the primary task.** It should be noted that some of the skills and knowledge that underpin the competences may well have been obtained during shore based training.
- Space is provided to record completion of each training task twice by the supervising officer. This does not mean that each task must be completed twice if, in the opinion of the officer, once is considered sufficient.
- The officer supervising the trainee does not necessarily have to be the designated training officer.
- Before 'Competence Demonstrated' is recorded (in the light blue box), the master or designated on board training officer may record any appropriate advice about areas for improvement. A large blank space for this purpose is provided beneath the criteria for evaluation. As competence in these primary tasks is demonstrated, the appropriate light blue box next to the criteria for evaluation, on the far right hand side of the page, should be signed and dated (day, month and year) by the master or designated training officer on board the ship to attest that competence has been demonstrated.
- A trainee's attainment of the competence should only be recorded as 'Competence Demonstrated' when the master or designated training officer is indeed satisfied that the trainee can perform the duty without supervision.
- When recording 'Competence Demonstrated', careful account should be taken of the criteria for evaluation contained on the right hand side of the page, which is taken from the STCW Code, as well as the best practices of seafarers and good safe working practice.

SECTION 6 TASKS FOR SUPPORT LEVEL RATINGS FORMING PART OF A NAVIGATIONAL WATCH

This section can be completed on its own for certification as a deck rating forming part of a navigational watch, or can be completed in combination with the training set out in Section 7 for certification as an Able Seafarer Deck.

The training in this section of this record book covers the requirement for the certification of ratings forming part of a navigational watch. The competences covered by Section A-II/4 of the STCW Code are limited to the function Navigation at the Support Level.

The requirements for certification are set out in STCW Regulation II/4:

Regulation II/4

Mandatory minimum requirements for certification of ratings forming part of a navigational watch

- 1 Every rating forming part of a navigational watch on a seagoing ship of 500 gross tonnage or more, other than ratings under training and ratings whose duties while on watch are of an unskilled nature, shall be duly certificated to perform such duties.
- 2 Every candidate for certification shall:
 - .1 be not less than 16 years of age;
 - .2 have completed:
 - .2.1 approved seagoing service including not less than six months of training and experience, or
 - .2.2 special training, either pre-sea or on board ship, including an approved period of seagoing service which shall not be less than two months; and
 - .3 meet the standard of competence specified in section A-II/4 of the STCW Code.
- 3 The seagoing service, training and experience required by subparagraphs 2.2.1 and 2.2.2 shall be associated with navigational watchkeeping functions and involve the performance of duties carried out under the direct supervision of the master, the officer in charge of the navigational watch or a qualified rating.

Completion of the ISF Training Record Book for deck ratings should ensure a structured approach is undertaken so that trainees can first qualify as ratings forming part of a navigational watch. However, completing Sections 6 and 7 together might assist in early certification as an Able Seafarer Deck.

A Task Summary Chart, which trainees can tick off as they complete their on board training tasks, can be found in Section 9.

FUNCTION: NAVIGATION AT THE SUPPORT LEVEL FOR RATINGS FORMING PART OF A NAVIGATIONAL WATCH

It is important that you learn to steer the ship at sea and understand how to execute helm orders correctly. You should take turns at the wheel by day, by night and when entering and leaving port. Ensure that you keep a proper record of your steering experience by asking the officer in charge to complete the steering record on page 60. When you have completed the turns at the wheel for at least the periods shown as on page 63, ask the master to sign the trainee's Steering Certificate.

Ref No	Training		Criteria for Evaluation	Competence Demonstrated	
1.	Competence: Steer the ship and comply with helm orders, also in the English language			Designated Training Officer/In Service Assessor (Initials/Date)	
1.1	Use of magnetic and gyro compasses; helm orders and change-over from automatic pilot to hand steering and vice versa		A steady course is steered within acceptable limits having regard to the area of navigation and prevailing sea state. 	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)	Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Demonstrate knowledge of various types of compass card				
.2	Execute helm orders correctly				
.3	Demonstrate procedure for handing over the wheel				
.4	Understand operation of main steering system and auto pilot				
.5	Demonstrate correct procedure under supervision for changing over from manual steering to auto pilot and vice versa				
.6	Steer by magnetic compass				
.7	Steer by gyro compass				
.8	Take turns at the wheel in steering the ship for periods totalling at least 10 hours, excluding periods of instruction (see trainee's Steering Record on page 60)				
.9	Comply with and respond to helm orders in the English language				
.10	Take the wheel when entering/departing port				

.11	Take the wheel in canal/river transit/narrow channel					
.12	Assist with the change-over to emergency steering systems in the steering flat					

Ref No	Training		Criteria for Evaluation	Competence Demonstrated	
2.	Competence: Keep a proper look-out by sight and hearing			Designated Training Officer/In Service Assessor (Initials/Date)	
2.1	Responsibilities of a look-out, including reporting the approximate bearing of a sound signal, light or other object in degrees or points				
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)	Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Understand the responsibilities of a look-out				
.2	Perform look-out duties and report sounds, lights or other objects in degrees or points				
.3	Recognise aids to navigation such as lighthouses, beacons and buoys				
.4	Recognise distress or emergency signals				
.5	Recognise and report a GMDSS alarm (and other alarms)				

Ref No	Training		Criteria for Evaluation		Competence Demonstrated	
3.	Competence: Contribute to monitoring and controlling a safe watch				Designated Training Officer/In Service Assessor (Initials/Date)	
3.1	Demonstrate use of shipboard terms and definitions in connection with the following:		Communications are clear and concise and advice/clarification is sought from the officer on watch when watch information or instructions are not clearly understood			
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)	Advice on Areas for Improvement		Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Explain the marking on anchor cables					
.2	Assist with: Preparation of anchors prior to letting go					
.3	Weighing and securing anchors for sea					
.4	Letting go an anchor					
.5	Under supervision enter a chain locker, peak tank or other forward compartment					
.6	Practise knots, bends, hitches and whippings					
.7	Practise splices in ropes and wires					
.8	Identify types of rope and wire and know their uses					
.9	Break out new coils of ropes and wires					
.10	Stow wire and ropes with due regard to their preservation					
.11	Make up items of wire running gear or standing gear					
.12	Assist with the rigging of heavy lift derricks					
.13	Inspect holds for safety, with special regard to hatch boards, ladders, guard wires and stanchions, permanent dunnage, beams and beam bolts, lighting and accesses					
.14	Assist with rigging portable lights					

.15	With due regard to safety, start, operate and assist with routine maintenance of winches					
.16	Demonstrate a knowledge of location of engine room emergency escape routes					
3.2	Use of appropriate internal communication and alarm systems			<i>Communications are clear and concise and advice/clarification is sought from the officer on watch when watch information or instructions are not clearly understood</i>		
.1	Assist in checking bridge steering control equipment, communication systems and all other navigational aids before leaving port					
.2	Use internal communications and test alarm systems					
.3	Acknowledge and report alarms to an officer					
3.3	Ability to understand orders and to communicate with the officer of the watch in matters relevant to watchkeeping duties; follow procedures for the relief, maintenance and handover of a watch; and interpret information required to maintain a safe watch			<i>Communications are clear and concise and advice/clarification is sought from the officer on watch where watch information or instructions are not clearly understood. Maintenance, handover and relief of the watch is in conformity with accepted practices and procedures</i>		
.1	Accompany an officer on rounds: At sea					
.2	At anchor					
.3	Accompany an officer on mooring operations: On the bridge					
.4	Anchoring					
.5	Securing tugs					
.6	Assist with inspecting the ship prior to sailing to ensure the ship is all secure to proceed to sea					
.7	Assist with searches for stowaways					
.8	Under the supervision of an officer, rig pilot ladders, including pilot hoists (if fitted)					
.9	Assist officer of the watch in anchor watch duties					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
3.	Competence: Contribute to monitoring and controlling a safe watch					
3.3	Ability to understand orders and to communicate with the officer of the watch in matters relevant to watchkeeping duties; follow procedures for the relief, maintenance and handover of a watch; and interpret information required to maintain a safe watch (continued)			Communications are clear and concise and advice/clarification is sought from the officer on watch where watch information or instructions are not clearly understood. Maintenance, handover and relief of the watch is in conformity with accepted practices and procedures		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.10	Assist in preparing for mooring: ropes, wires, stoppers, phones, lights, signals, fenders etc.					
.11	Understand cold weather precautions for steam, hydraulic and compressed air appliances					
.12	Under supervision start/operate winches and windlass					
.13	Under supervision run, heave, stopper and turn up mooring lines					
.14	Demonstrate safe handling of moorings, with particular reference to synthetic fibre ropes and self-tensioning winches					
.15	Demonstrate the correct procedure for the relief and handing over of a watch					
.16	Assist with ship security watches in port and at sea					
.17	Assist in checking the safety of walkways, ladders, handrails, container stools and other container fittings					
.18	Assist in checking cargo lashings					
.19	Understand information required to maintain a safe watch, as recommended in the ICS Bridge Procedures Guide					

3.4	Practice of basic environmental protection procedures			Tasks and exercises are completed in conformity with accepted practices and procedures		
.1	Participate in an emergency response exercise in port for a pollution incident					
.2	Demonstrate the procedure for alerting port emergency services					
.3	Demonstrate a knowledge of vessel's shipboard oil pollution emergency plan/shipboard marine pollution emergency plan					
.4	Plug and cement deck scuppers					
.5	Participate in bunkering operations					
.6	Demonstrate the emergency shut down procedure					
.7	Participate in an emergency response exercise for controlling spillage of oil on board					
.8	Participate in drill for clean-up of hazardous cargo spillage					
.9	Separate and dispose of garbage at sea or ashore in compliance with MARPOL					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
4.	Competence: Operate emergency equipment and apply emergency procedures					
4.1	Knowledge of emergency duties and alarm signals			<i>Initial action on becoming aware of an emergency or abnormal situation is in conformity with established practices and procedures. Communications are clear and concise at all times and orders are acknowledged in a seamanlike manner</i>		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Participate in a fire drill at sea					
.2	Participate in an emergency response exercise for: Heavy weather damage					
.3	Collision					
.4	Grounding					
.5	Rescue of survivors					
.6	Participate in a lifeboat drill for abandon ship					
.7	Participate in a response exercise for an unspecified emergency situation					
.8	Participate in an emergency response exercise in port for fire					
.9	Participate in a man overboard exercise					
.10	Assist with soundings of bilges, peak tanks, double bottom and other tanks, and record information					
.11	Demonstrate an understanding of the precautions required for entry into enclosed spaces					
.12	Participate in a search and rescue drill from an enclosed space					
.13	Assist with the maintenance of watertight doors and hatches					
.14	Understand use and assist in the maintenance of: Portable foam extinguisher					

.15	Portable CO ₂ extinguisher					
.16	Portable dry powder extinguisher					
.17	Portable water extinguisher					
.18	Demonstrate use of safety harness and line					
.19	Assist with preparation and swinging out of lifeboats and be aware of attendant dangers					
.20	Assist with lowering a lifeboat to clear the ship and ride to a sea anchor					
.21	Assist with starting and operation of lifeboat engine					
.22	Participate in an emergency first aid drill at sea					
.23	Demonstrate a basic understanding of first aid principles: Stopping bleeding					
.24	Treatment of suffocation/drowning					
.25	Placing casualty in the recovery position					
4.2	Knowledge of pyrotechnic distress signals; satellite EPIRBs and SARTs			<i>The integrity of emergency and distress alerting systems is maintained at all times</i>		
.1	Locate and state how to operate EPIRBs and SARTs					
.2	Locate and state how to operate pyrotechnic distress signals					
.3	Explain the operation of distress rockets, flares and other pyrotechnics					
4.3	Avoidance of false distress alerts and action to be taken in event of accidental activation			<i>The integrity of emergency and distress alerting systems is maintained at all times</i>		
.1	Demonstrate an understanding of the correct use of the equipment required in survival craft					
.2	State how to avoid false distress alerts with distress signalling equipment					
.3	State action to be taken in event of accidental activation					

SECTION 7 TASKS FOR RATINGS QUALIFYING AS ABLE SEAFARER DECK

The training tasks for Able Seafarer Deck which follow may be completed alongside watch rating tasks for Navigation at the Support Level contained in Section 6. This may assist in the early achievement of Able Seafarer Deck certification.

The STCW competence standards for Able Seafarer Deck reflect the broader work of deck ratings and include additional competences in Navigation plus competences for three additional Support Level functions:

- Cargo Handling and Stowage;
- Controlling the Operation of the Ship and Care for Persons on Board; and
- Maintenance and Repair.

The requirements for certification of Able Seafarers Deck are set out in the STCW Regulation II/5:

Regulation II/5

Mandatory minimum requirements for certification of ratings as Able Seafarer Deck

- 1 Every Able Seafarer Deck serving on a seagoing ship of 500 gross tonnage or more shall be duly certificated.
- 2 Every candidate for certification shall:
 - .1 be not less than 18 years of age;
 - .2 meet the requirements for certification as a rating forming part of a navigational watch;
 - .3 while qualified to serve as a rating forming part of a navigational watch, have approved seagoing service in the deck department of:
 - .3.1 not less than 18 months, or
 - .3.2 not less than 12 months and have completed approved training; and
 - .4 meet the standard of competence specified in section A-II/5 of the STCW Code.

A Task Summary Chart, which trainees can tick off as they complete their on board training tasks, can be found in Section 9.

FUNCTION: NAVIGATION AT THE SUPPORT LEVEL (ABLE SEAFARER DECK)

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
5.	Competence: Contribute to a safe navigational watch					
5.1	Ability to understand orders and to communicate with the officer of the watch in matters relevant to watchkeeping duties			Communications are clear and concise. Maintenance, handover and relief of the watch is in conformity with acceptable practices and procedures		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Understand orders for running, heaving, stoppering and making fast mooring lines					
.2	Understand orders for letting go, weighing and securing anchors for sea					
.3	Understand orders for securing and letting go tugs lines					
.4	Prepare anchors for letting go (without supervision)					
.5	Promptly seek clarification and confirmation if an officer's order is unclear or contrary to normal practices					
.6	Play an effective role as a team member at all times					
5.2	Procedures for the relief, maintenance and handover of a watch			Communications are clear and concise. Maintenance, handover and relief of the watch is in conformity with acceptable practices and procedures		
.1	Consistently arrive on watch correctly dressed, fit for duty and on time					
.2	Receive and pass on clearly all information relevant to the watch (at sea, at anchor, in port)					
.3	Seek clarification if unsure of any matter when taking over the watch					
.4	Make and report rounds at sea					
.5	Make and report rounds at anchor					

Ref No	Training		Criteria for Evaluation		Competence Demonstrated	
5.	Competence: Contribute to a safe navigational watch				Designated Training Officer/In Service Assessor (Initials/Date)	
5.2	Procedures for the relief, maintenance and handover of a watch (continued)		Communications are clear and concise. Maintenance, handover and relief of the watch is in conformity with acceptable practices and procedures			
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.6	Make and report rounds in port					
.7	Refuse to hand over the watch if reason to believe that the relief is not capable of carrying out watchkeeping duties effectively					
5.3	Information required to maintain a safe watch		Communications are clear and concise. Maintenance, handover and relief of the watch is in conformity with acceptable practices and procedures			
.1	In port, maintain deck security watch and control of visitors					
.2	Check for safety hazards on deck, gangways and access points					
.3	Ensure gangway is adjusted to maintain safe access at all times particularly at night					
.4	Demonstrate procedure for alerting port emergency services					
.5	Explain what to do when alerted to man overboard, or other emergency					
.6	Assist in securing decks for severe weather					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated	
6.	Competence: Contribute to berthing, anchoring and other mooring operations				Designated Training Officer/In Service Assessor (Initials/Date)	
6.1	Working knowledge of the mooring system and related procedures			Operations are carried out in accordance with established safety practices and equipment operating instructions		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Prepare for mooring: heaving lines, ropes, wires, stoppers, communications, lights, fenders etc					
.2	Run off ropes stowed on reels and flake out for use					
.3	Run, heave, stopper and turn up mooring lines					
.4	Stopper off a rope and wire					
.5	Secure all equipment after mooring					
.6	Prepare for unmooring: ropes, wires, communications, lights, fenders etc					
6.2	Working knowledge of the mooring system and related procedures including the capacities, safe working loads, and breaking strengths of mooring equipment including mooring wires, synthetic and fibre lines, winches, anchor windlasses, capstans, bitts, chocks and bollards			Operations are carried out in accordance with established safety practices and equipment operating instructions		
.1	Be an effective team member in mooring and unmooring on forecastle					
.2	Be an effective team member in mooring and unmooring aft					
.3	Be aware of safe working load and breaking strain of synthetic ropes and mooring wires					
.4	Understand the safe working load and breaking strength of winches, capstans, bitts, chocks and bollards					
.5	Understand working load limit (WLL) of capstans and windlass					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
6.	Competence: Contribute to berthing, anchoring and other mooring operations					
6.3	Working knowledge of the mooring system procedures and order of events for making fast and letting go mooring and tug lines and wires including towing lines			Operations are carried out in accordance with established safety practices and equipment operating instructions		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Explain the sequence of mooring operations and safe working practice in mooring					
.2	Understand why synthetic ropes and wires are not normally used together as springs, head or stern lines					
.3	Explain the sequence of unmooring operations					
.4	Identify leads, bitts and connections suitable for towing					
.5	Understand use of a messenger in taking, giving or receiving a towing line or other heavy duty line					
.6	Secure and let go tug lines					
.7	Report promptly faults or deficiencies in equipment used					
6.4	Working knowledge of the mooring system procedures and order of events for the use of anchors in various operations			Operations are carried out in accordance with established safety practices and equipment operating instructions		
.1	Tend mooring lines, wires and gangway while alongside					
.2	Clear away and walk back an anchor					
.3	Understand risks in letting go an anchor from hawse pipe when vessel making excessive way					
.4	Assist with letting go an anchor and secure when brought up					
.5	Display appropriate signal when anchored					

.6	Assist with weighing and securing anchors for sea					
.7	Identify and report markings on an anchor cable					
.8	Report promptly faults or deficiencies in equipment used					
6.5	Working knowledge of the procedure and order of events associated with mooring to a buoy or buoys			<i>Operations are carried out in accordance with established safety practices and equipment operating instructions</i>		
.1	Understand preparations for picking up mooring hawser					
.2	Understand use of messenger/pick up lines for running cables					
.3	Understand arrangements for use of chafe chains/gear and marker buoys					

FUNCTION: CARGO HANDLING AND STOWAGE AT THE SUPPORT LEVEL (ABLE SEAFARER DECK)

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
7.	Competence: Contribute to the handling of cargo and stores					
7.1	Knowledge of procedures for safe handling, stowage and securing of cargoes and stores, including dangerous, hazardous and harmful substances and liquids			Cargo and stores operations are carried out in accordance with established safety procedures and equipment operating instructions. The handling of dangerous, hazardous and harmful cargoes or stores complies with established safety practices		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Assist in preparation of holds					
.2	Recognise the markings on containers					
.3	Check connection of refrigerated containers to ship's systems					
.4	Check lashings on deck containers					
.5	Assist in securing cargo stowed below deck					
.6	Assist in securing cargo stowed on deck					
.7	Batten down and secure hatch covers or cargo tank lids					
.8	Assist with receiving, checking, stowage and securing ship's stores					

7.2	Basic knowledge of and precautions to observe in connection with particular types of cargo and identification of IMDG labelling	Cargo and stores operations are carried out in accordance with established safety procedures and equipment operating instructions. The handling of dangerous, hazardous and harmful cargoes or stores complies with established safety practices				
.1	Recognise markings and labels that indicate stores or cargoes are classified as dangerous goods					
.2	Recognise DG placards and marking of cargo transport units including intermediate bulk containers (IBCs)					
.3	Understand that dangerous goods are always stowed and segregated in accordance with the IMDG Code					
.4	Describe procedure to follow in event of leakage of dangerous, hazardous and harmful stores or cargoes					
.5	Understand the reasons and need for separation of dangerous, hazardous and harmful stores or cargoes					
.6	Understand need to secure dangerous goods and to secure adjacent cargoes					
.7	Check container security seals are intact and not tampered with					

FUNCTION: CARGO HANDLING AND STOWAGE AT THE SUPPORT LEVEL – ADDITIONAL TASKS FOR TANKERS (ABLE SEAFARER DECK)

Ref No	Training	Criteria for Evaluation		Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
8.	Competence: Contribute to the handling of cargo and stores				
8.1	Knowledge of procedures for safe handling, stowage and securing of cargoes and stores, including dangerous, hazardous and harmful substances and liquids	Cargo and stores operations are carried out in accordance with established safety procedures and equipment operating instructions. The handling of dangerous, hazardous and harmful cargoes or stores complies with established safety practices			
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)
.1	Assist as a team member in the following tanker operations: Deballasting				
.2	Purging				
.3	Inerting				
.4	Positioning of pollution control equipment in accordance with company and terminal regulations				
.5	Testing of emergency shut-down procedure				
.6	Demonstrate a knowledge of pump-room / cargo control room pipeline systems				
.7	Assist in loading operations				
.8	Assist with topping-off tanks				
.9	Assist with the operation of ullage gauges (fixed and portable)				
.10	Assist with the operation of the gas venting system and pressure vacuum valves				
.11	Assist in discharging operations				
.12	Assist in crude oil washing				

.13	Assist in ballasting					
.14	Assist with the operation of tanker equipment: Set up and start up of cargo pumps					
.15	Set up and start up of inert gas plant					
.16	Assist with stripping tanks					
.17	Assist with the operation of the inert gas plant					
.18	Assist with tank cleaning					
.19	Assist with gas freeing					
.20	Assist with preparation for tank entry					
.21	Assist with the operation of the following equipment: Thermometers, hydrometers, sounding rods					
.22	Portable tank washing machines					
.23	Fixed tank washing machines					
.24	Programmable washing units					
.25	Gas freeing fans					
.26	Ullage gauges (fixed and portable)					
8.2	Basic knowledge of and precautions to observe in connection with particular types of cargo and identification of IMDG labelling			<i>Cargo and stores operations are carried out in accordance with established safety procedures and equipment operating instructions. The handling of dangerous, hazardous and harmful cargoes or stores complies with established safety practices</i>		
.1	Understand that as oil cargoes are dangerous goods they are loaded and segregated in accordance with the IMDG Code					
.2	Understand that certain cargoes need to be heated during carriage					

FUNCTION: CONTROLLING THE OPERATION OF THE SHIP AND
CARE FOR PERSONS ON BOARD AT THE SUPPORT LEVEL (ABLE SEAFARER DECK)

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
9.	Competence: Contribute to the safe operation of deck equipment and machinery					
9.1	Knowledge of deck equipment: Function and uses of valves and pumps, hoists, cranes, booms and related equipment			<i>Operations are carried out in accordance with established safety practices and equipment operating instructions</i>		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Operate hoists, cranes and booms					
.2	Understand that cranes should not be used for dragging					
.3	Sling hoists in a secure and safe manner					
.4	Understand boom limiting angles					
.5	Take charge of lifting appliances in the role of signaller					
.6	Identify where to find safe working load (SWL) or working load limit (WLL) of equipment and explain what this means					
.7	Understand that a load greater than the SWL should not be lifted					
.8	Assist with testing emergency shutdown of pumps and associated valves					
.9	Assist with use of portable winches and pumps					
9.2	Knowledge of deck equipment: Function and uses of winches, windlasses, capstans and related equipment			<i>Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures</i>		
.1	Operate capstan and winches with due regard to safety					
.2	Assist with securing loads using chains and slings					

.3	Correctly identify SWL of shackles, wires, chains and slings				
.4	Understand how falls or runners are secured to winch barrels				
.5	Correctly fit wire grips (e.g. 'bulldog' grips) when needed				
.6	Understand the impact of leading ropes and wires at acute angles				
9.3	Knowledge of deck equipment: Hatches, watertight doors, ports and related equipment	<i>Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures</i>			
.1	Prepare hatch covers for opening				
.2	Operate mechanical hatch covers				
.3	Operate hydraulic hatch covers				
.4	Secure weather deck hatch covers and ports				
.5	Ensure locking pins secure on rolling covers				
.6	Assist with hose test or inspect hatch and watertight door closings to ensure integrity is being maintained				
.7	Understand that rubber sealing on hatches, doors and ports need replacing periodically				
.8	Rig guard wires, chains or fences at open hatches				
.9	Open and close watertight doors including bow, stern and shell doors where fitted				
.10	Understand the dangers associated with remotely power operated watertight doors				

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
9.	Competence: Contribute to the safe operation of deck equipment and machinery					
9.4	Knowledge of deck equipment: Fibre and wire ropes, cables and chains including their construction, use, markings, maintenance and proper stowage			Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Understand that manufacturers' instructions must be followed when replacing wires, topping up hydraulics and other routine maintenance tasks					
.2	Identify lay of rope and demonstrate how to coil for stowage					
.3	Use whipping or other means of terminating rope ends					
.4	Explain construction of wire ropes					
.5	Explain why and how cables may be broken at joining shackles (e.g. 'kenter' joining shackle)					
9.5	Knowledge of deck equipment: Ability to use and understand basic signals for the operation of equipment including winches, windlasses, cranes and hoists			Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures		
.1	Top or lower derricks at a speed consistent with the safe handling of guys					
.2	Understand commonly used hand signals for control of lifting appliances and winches (e.g. Code of Hand Signals)					
.3	Operate capstan and winches with due regard to safety					

9.6	Knowledge of deck equipment: Ability to operate anchoring equipment under various conditions such as anchoring, weighing anchor, securing for sea and in emergencies	Equipment operation is safely carried out in accordance with safe industry practice		
.1	Don appropriate safety clothing for anchoring			
.2	Check brakes are secure before releasing securing devices			
.3	Secure anchors and chain cables for sea passage			
.4	Stow ropes and secure equipment for sea			
.5	Secure covers on vents, hatches and other locations			
9.7	Knowledge of the following procedures and ability to: Rig and unrig bosun's chairs and staging	Demonstrate the proper methods for rigging and unrigging in accordance with safe industry practice		
.1	Assist with rigging bosun's chair with gantline, double sheet bend and seizing			
.2	Demonstrate making and using lowering hitch with bosun's chair			
.3	Understand importance of proper inspection, testing, use and stowage of gantlines			
.4	Rig stages or cradles			
9.8	Knowledge of the following procedures and ability to: Rig and unrig pilot ladders, hoists, rat-guards and gangways	Demonstrate the proper methods for rigging and unrigging in accordance with safe industry practice		
.1	Rig and stow pilot ladders, including pilot hoists			
.2	Understand that pilot ladders are reserved for use only by pilots			
.3	Assist with rigging/stowing gangways and accommodation ladders			
.4	Securely rig safety nets to prevent persons falling between ship and quay or onto the quay			
.5	Attach and tend rat-guards			

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
9.	Competence: Contribute to the safe operation of deck equipment and machinery					
9.9	Knowledge of the following procedures and ability to: Use seamanship skills including the proper use of knots, splices and stoppers			Demonstrate the proper methods for handling lines, wires, cables and chains		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Select and correctly apply chain or rope stoppers					
.2	Apply seizings to cargo gear shackles					
.3	Make monkey's fist for heaving lines					
.4	Demonstrate common splices in rope and wire rope					
.5	Parcel and serve a splice					
.6	Demonstrate eye splice in multi-strand plaited rope					
.7	Demonstrate use of common knots, bends and hitches in correct applications					
9.10	Use and handling of deck and cargo handling gear and equipment: Access arrangements, hatches and hatch covers, ramps, side/bow/stern doors or elevators			Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures		
.1	Report defects in any lifting plant immediately to responsible officer					
.2	Assist with operating ramps, doors etc					
.3	Understand safety hazards in opening ramps, doors etc					
.4	Understand effect on ship stability and watertight integrity if doors are unsecured					
.5	Recognise alarms associated with ramp and door operations					
.6	Understand elevators must not be used in emergencies					

9.11	Use and handling of deck and cargo handling gear and equipment: Pipeline systems – bilge and ballast, suctions and wells			<i>Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures</i>		
.1	Recognise pipeline colour code markings for fresh water, sea water, fuel oil and lube oil					
.2	Assist in ballasting operations					
.3	Assist with taking fresh water					
.4	Check and clean tank suctions, strum boxes and wells					
.5	Sound tanks and bilges					
9.12	Use and handling of deck and cargo handling gear and equipment: Cranes, derricks, winches			<i>Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures</i>		
.1	Assist with topping and operating cranes. Secure after use					
.2	Top and position derricks with due regard to effective leads from guys					
.3	Operate winches					
.4	Select correct gear for slinging lifts					
9.13	Knowledge of hoisting and dipping flags and the main single flag signals (A, B, G, H, O, P, Q)			<i>Communications within the operator's area of responsibility are consistently successful. Equipment operation is safely carried out in accordance with established procedures</i>		
.1	Understand accepted etiquette for dipping ensigns					
.2	Hoist courtesy flags as directed					
.3	Hoist single flag signals as instructed					
.4	Recognise and state the meaning of the main single flag signals					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
10.	Competence: Apply occupational health and safety precautions					
10.1	Working knowledge of safe working practices and personal shipboard safety: Working aloft			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Apply safe working practices in working aloft					
.2	Wear and use correct safety equipment (safety harness, fall arrester, etc)					
.3	Understand risks associated with portable ladders, scaffolds and towers					
.4	Secure tools with fall arrester					
10.2	Working knowledge of safe working practices and personal shipboard safety: Working over the side			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	Apply safe working practices in working over the side					
.2	Wear and use correct safety equipment (safety harness, fall arrester, etc)					
.3	Secure tools with fall arrester					
10.3	Working knowledge of safe working practices and personal shipboard safety: Working in enclosed spaces			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	State list of enclosed spaces on board					
.2	Recognise that all cargo holds are enclosed spaces					
.3	Seek permit to work before entry into an enclosed space					

.4	Demonstrate the safe working practice for entry into an enclosed space					
10.4	Working knowledge of safe working practices and personal shipboard safety: Permit to work systems			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	Demonstrate an understanding of the ship's permit to work system					
.2	Demonstrate an understanding of risk assessment					
.3	Prepare work areas in accordance with safe working practices					
.4	Stow equipment, tools and surplus materials on completion					
.5	Seek guidance if in any doubt concerning task or safety matters					
10.5	Working knowledge of safe working practices and personal shipboard safety: Line handling (e.g. mooring operations)			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	Apply safe working practices in line handling					
.2	Work as an effective team member in line handling					
.3	Demonstrate an understanding of risks in line handling					
10.6	Working knowledge of safe working practices and personal shipboard safety: Lifting techniques and methods of preventing back injury			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	Apply safe working practices in manual lifting and carrying					
.2	Demonstrate correct manual handling techniques					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
10.	Competence: Apply occupational health and safety precautions					
10.7	Working knowledge of safe working practices and personal shipboard safety: Electrical safety			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Apply safe working practices in using electric power operated tools and equipment					
.2	Understand risks associated with using portable electric lamps					
.3	Understand risk of shock is greater in damp or humid conditions					
.4	Report defective or damaged connectors or cables					
10.8	Working knowledge of safe working practices and personal shipboard safety: Mechanical safety			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	Apply safe working practices in using lifting gear					
.2	Ensure correct safety guards for appliances are securely fixed before start up					
.3	Understand hazards associated with hydraulic and pneumatically operated mechanical equipment and tools					
10.9	Working knowledge of safe working practices and personal shipboard safety: Chemical and biohazard safety			Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times		
.1	Comply with health, hygiene and safety requirements when handling hazardous substances					
.2	Follow instructions and precautions when working with cleaning fluids, paints, toxic materials etc					
.3	Understand potential hazards are found in suppliers' data sheets					

.4	Seek advice if unsure of risks or hazards of materials					
10.10	Working knowledge of safe working practices and personal shipboard safety: Personal safety equipment			<i>Procedures designed to safeguard personnel and the ship are observed at all times. Safe working practices are observed and appropriate safety and protective equipment is correctly used at all times</i>		
.1	Seek advice to use correct personal safety equipment for the tasks in hand					
.2	Report promptly faults or deficiencies in safety equipment					
.3	Recognise and understand meaning of prohibition, warning, mandatory and emergency safety signage					

Ref No	Training		Criteria for Evaluation	Competence Demonstrated		
11.	Competence: Apply precautions and contribute to the prevention of pollution of the marine environment			Designated Training Officer/In Service Assessor (Initials/Date)		
11.1	Knowledge of the precautions to be taken to prevent pollution of the marine environment		Procedures designed to safeguard the marine environment are observed at all times			
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Plug and cement deck scuppers for bunkering operations					
.2	Participate in bunkering operations					
.3	Demonstrate the emergency shutdown procedure for operations/equipment liable to cause pollution: Bunkering Incinerator Other					
.4	Understand the need to segregate waste, record amounts and land ashore for disposal					
.5	Seek advice if unsure of measures to take					

Ref No	Training	Criteria for Evaluation		Competence Demonstrated	
11.	Competence: Apply precautions and contribute to the prevention of pollution of the marine environment			Designated Training Officer/In Service Assessor (Initials/Date)	
11.2	Knowledge of the use and operation of anti-pollution equipment	Procedures designed to safeguard the marine environment are observed at all times			
	Task/Duty	Task Completed	Advice on Areas for Improvement	Task Completed	
		Supervising Officer/ Instructor (Initials/Date)		Supervising Officer/ Instructor (Initials/Date)	
.1	Participate in an emergency response exercise for controlling spillage of oil on board				
.2	Participate in drill for clean-up of hazardous cargo spillage				
.3	Collect and segregate waste and garbage				
.4	Operate garbage compactor unit and incinerator (where fitted)				
.5	Collect and segregate cargo sweepings				
11.3	Knowledge of the approved methods for disposal of marine pollutants	Procedures designed to safeguard the marine environment are observed at all times			
.1	Understand that marine pollutants must be landed ashore for safe disposal in compliance with MARPOL				
.2	Understand there are strict rules covering disposal of oily water mixtures applicable to all ships				
.3	Understand there are strict rules covering disposal of noxious liquid substances applicable to all ships				
.4	Understand there are strict rules covering disposal of harmful substances carried in packaged form applicable to ships				
.5	Understand there are strict rules covering pollution prevention by sewage applicable to ships				
.6	Understand there are strict rules for prevention of pollution by garbage applicable to all ships				
.7	Understand there are strict rules covering air pollution from ships applicable to all ships				

Ref No	Training		Criteria for Evaluation	Competence Demonstrated	
12.	Competence: Operate survival craft and rescue boats			Designated Training Officer/In Service Assessor (Initials/Date)	
12.1	Knowledge of the operation of survival craft and rescue boats, their launching appliances and arrangements, and their equipment and survival at sea techniques		Actions in responding to abandon ship and survival situations are appropriate to the prevailing circumstances and conditions and comply with accepted safety practices and standards		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)	Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Attended Proficiency in Survival Craft & Rescue Boats course compliant with STCW Code Section A-VI/2				
.2	Participate in a drill for launching: Lifeboat				
.3	Life-raft				
.4	Free fall boat (where fitted)				
.5	Fast rescue boat				
.6	Participate in a drill for recovery and stowing: Lifeboat				
.7	Free fall boat (where fitted)				
.8	Fast rescue boat				

FUNCTION: MAINTENANCE AND REPAIR AT THE SUPPORT LEVEL (ABLE SEAFARER DECK)

Ref No	Training			Criteria for Evaluation	Competence Demonstrated Designated Training Officer/In Service Assessor (Initials/Date)	
13.	Competence: Contribute to shipboard maintenance and repair					
13.1	Knowledge of surface preparation techniques			Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.1	Prepare steel work for coating : Use manual chipping hammer and powered scaling equipment					
.2	Understand different coating sequences may be used and that paint manufacturers' instructions must be followed					
.3	Understand rust removers are acidic, and eyes and skin should be protected					
.4	Understand that some paints, once mixed, may have limited time for application					
.5	Understand the need to follow mixing instructions					
13.2	Ability to use painting, lubrication and cleaning materials and equipment			Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications		
.1	Clean and maintain paintwork					
.2	Clean and maintain deck surfaces					
.3	Prepare and apply paint using brush/roller					
.4	Prepare and apply paint using spraying equipment					
.5	Apply protective coatings as directed					
.6	Lubricate and grease windlass, winches, blocks, chocks, fairleads and other moving parts on deck					

.7	Lubricate lifeboat falls					
.8	Lubricate crane wires and winch runners					
.9	Lubricate mooring wires					
13.3	Ability to understand and execute routine maintenance and repair procedures			<i>Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications</i>		
.1	Understand that schedules apply to lubrication, overhaul and testing of lifting and mechanical equipment					
.2	Select and use correct fluids, lubricant or grease					
.3	Use grease gun and lubricating equipment					
.4	Stow equipment and leave areas clean, tidy and safe on completion of work					
	For tankers:					
.5	Assist with the overhaul of: Tank washing machines					
.6	Gas freeing fans					
.7	Ullage gauges					
.8	Pressure vacuum valve					
.9	Valve gland					
.10	Mud box					
.11	Tank lids					
.12	Air hoist					
.13	Eductor					
.14	Assist with cleaning of manifold save-alls					

Ref No	Training			Criteria for Evaluation	Competence Demonstrated	
13.	Competence: Contribute to shipboard maintenance and repair				Designated Training Officer/In Service Assessor (Initials/Date)	
13.3	Ability to understand and execute routine maintenance and repair procedures (continued)			Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications		
	Task/Duty	Task Completed Supervising Officer/ Instructor (Initials/Date)		Advice on Areas for Improvement	Task Completed Supervising Officer/ Instructor (Initials/Date)	
.15	Assist with maintenance of: Inert gas plant pipelines					
.16	Closed circuit loading arrangements					
.17	Pipelines and valves					
13.4	Understanding manufacturer's safety guidelines and shipboard instructions			Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications		
.1	Understand need to use correct personal protective equipment in maintenance and repair tasks					
.2	Understand paints may contain toxic or irritant substances					
.3	Understand solvents or adhesives may give rise to flammable and potentially explosive vapours					
.4	Understand need for interior and enclosed spaces to be well ventilated during and after painting					
13.5	Knowledge of safe disposal of waste materials			Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications		
.1	Follow correct procedures for disposal of paint residues, solvents and sweepings					

13.6	Knowledge of the application, maintenance and use of hand and power tools	Maintenance and repair activities are carried out in accordance with technical safety and procedural specifications			
.1	Understand equipment should only be used according to the purpose for which it is designed				
.2	Apply safe working practices for using power operated tools and equipment				
.3	Select and use correct type of drill bit, cutting blade, abrasive wheel for task in hand				
.4	Select correct hand tools for task in hand				
.5	Isolate equipment when not in use				
.6	Report defective or damaged equipment				

SECTION 8 TRAINEE'S STEERING RECORD

Steering	Voyage		Steered			Remarks	Signature of Officer in Charge of the Watch		
	From	To	Date	Duration					
				From	To				
By compass – By day									
– By night									

Steering	Voyage		Steered			Remarks	Signature of Officer in Charge of the Watch		
	From	To	Date	Duration					
				From	To				
By sight (without aid of compass)									
Entering or leaving port									
TOTAL DURATION									

STEERING CERTIFICATE

Surname

Other Names

Seafarer's Book No.

Usual Signature

THIS IS TO CERTIFY THAT THE ABOVE NAMED HAS BEEN UNDER TRAINING ON

mv/ss

From

To

During this period the trainee took turns at the steering wheel. From the records and during training on this ship it is confirmed that the trainee has taken turns at the wheel in steering the ship (apart from periods of instruction) for the duration as detailed below:

has been found to be a proficient hand for steering the ship.

Master

Date

A. Steering by compass by day

hours

mv/ss

B. Steering by compass by night

hours

Owned by

C. Steering by sight

hours

Ship's Official Stamp

D. Steering while entering and leaving port

hours

NB It is recommended that the trainee should have taken turns at the wheel for at least the following minimum periods:

A. Steering by compass by day: 10 hours

C. Steering by sight (without the aid of compass): 5 hours

B. Steering by compass by night: 10 hours

D. Steering while entering and leaving port: 5 hours

SECTION 9 TASK SUMMARY CHART – RATINGS FORMING PART OF A NAVIGATIONAL WATCH

The purpose of the summary chart is to provide you, your company and your ships' masters and officers with a guide and continuous check on the numbers of tasks or duties that you have completed (as listed in Section 6), and those that remain outstanding. Tick off only those tasks which you have completed. In the charts below the tinted boxes simply indicate the start of a new group of tasks or duties.

FUNCTION – Navigation at the Support Level

1. COMPETENCE – Steer the ship and comply with helm orders, also in the English language

1.1.1	1.1.2	1.1.3	1.1.4	1.1.5	1.1.6	1.1.7	1.1.8	1.1.9	1.1.10	1.1.11	1.1.12

2. COMPETENCE – Keep a proper look-out by sight and hearing

2.1.1	2.1.2	2.1.3	2.1.4	2.1.5

3. COMPETENCE – Contribute to monitoring and controlling a safe watch

3.1.1	3.1.2	3.1.3	3.1.4	3.1.5	3.1.6	3.1.7	3.1.8	3.1.9	3.1.10	3.1.11	3.1.12	3.1.13	3.1.14	3.1.15	3.1.16
3.2.1	3.2.2	3.2.3	3.3.1	3.3.2	3.3.3	3.3.4	3.3.5	3.3.6	3.3.7	3.3.8	3.3.9	3.3.10	3.3.11	3.3.12	3.3.13
3.3.14	3.3.15	3.3.16	3.3.17	3.3.18	3.3.19	3.4.1	3.4.2	3.4.3	3.4.4	3.4.5	3.4.6	3.4.7	3.4.8	3.4.9	

4. COMPETENCE – Operate emergency equipment and apply emergency procedures

4.1.1	4.1.2	4.1.3	4.1.4	4.1.5	4.1.6	4.1.7	4.1.8	4.1.9	4.1.10	4.1.11	4.1.12	4.1.13	4.1.14	4.1.15	4.1.16
4.1.17	4.1.18	4.1.19	4.1.20	4.1.21	4.1.22	4.1.23	4.1.24	4.1.25	4.2.1	4.2.2	4.2.3	4.3.1	4.3.2	4.3.3	

The purpose of the summary chart is to provide you, your company and your ships' masters and officers with a guide and continuous check on the numbers of tasks or duties that you have completed (as listed in Section 7), and those that remain outstanding. Tick off only those tasks which you have completed. In the charts below the tinted boxes simply indicate the start of a new group of tasks or duties.

5. COMPETENCE – Contribute to a safe navigational watch

6. COMPETENCE – Contribute to berthing, anchoring and other mooring operations

FUNCTION – Cargo Handling and Stowage at the Support Level

[illegible]

FUNCTION – Cargo Handling and Stowage at the Support Level – Additional Tasks for Tankers

8. COMPETENCE – Contribute to the handling of cargo and stores

8.1.1	8.1.2	8.1.3	8.1.4	8.1.5	8.1.6	8.1.7	8.1.8	8.1.9	8.1.10	8.1.11	8.1.12	8.1.13	8.1.14	8.1.15	8.1.16
8.1.17	8.1.18	8.1.19	8.1.20	8.1.21	8.1.22	8.1.23	8.1.24	8.1.25	8.1.26	8.2.1	8.2.2				

FUNCTION – Controlling the Operation of the Ship and Care for Persons on Board at the Support Level

9. COMPETENCE – Contribute to the safe operation of deck equipment and machinery

9.1.1	9.1.2	9.1.3	9.1.4	9.1.5	9.1.6	9.1.7	9.1.8	9.1.9	9.2.1	9.2.2	9.2.3	9.2.4	9.2.5	9.2.6	9.3.1
9.3.2	9.3.3	9.3.4	9.3.5	9.3.6	9.3.7	9.3.8	9.3.9	9.3.10	9.4.1	9.4.2	9.4.3	9.4.4	9.4.5	9.5.1	9.5.2
9.5.3	9.6.1	9.6.2	9.6.3	9.6.4	9.6.5	9.7.1	9.7.2	9.7.3	9.7.4	9.8.1	9.8.2	9.8.3	9.8.4	9.8.5	9.9.1
9.9.2	9.9.3	9.9.4	9.9.5	9.9.6	9.9.7	9.10.1	9.10.2	9.10.3	9.10.4	9.10.5	9.10.6	9.11.1	9.11.2	9.11.3	9.11.4
9.11.5	9.12.1	9.12.2	9.12.3	9.12.4	9.13.1	9.13.2	9.13.3	9.13.4							

10. COMPETENCE – Apply occupational health and safety precautions

10.1.1	10.1.2	10.1.3	10.1.4	10.2.1	10.2.2	10.2.3	10.3.1	10.3.2	10.3.3	10.3.4	10.4.1	10.4.2	10.4.3	10.4.4	10.4.5
10.5.1	10.5.2	10.5.3	10.6.1	10.6.2	10.7.1	10.7.2	10.7.3	10.7.4	10.8.1	10.8.2	10.8.3	10.9.1	10.9.2	10.9.3	10.9.4
10.10.1	10.10.2	10.10.3													

11. COMPETENCE – Apply precautions and contribute to the prevention of pollution of the marine environment

11.1.1	11.1.2	11.1.3	11.1.4	11.1.5	11.2.1	11.2.2	11.2.3	11.2.4	11.2.5	11.3.1	11.3.2	11.3.3	11.3.4	11.3.5	11.3.6
11.3.7															

12. COMPETENCE – Operate survival craft and rescue boats

12.1.1	12.1.2	12.1.3	12.1.4	12.1.5	12.1.6	12.1.7	12.1.8

FUNCTION – Maintenance and Repair at the Support Level**13. COMPETENCE – Contribute to shipboard maintenance and repair**

13.1.1	13.1.2	13.1.3	13.1.4	13.1.5	13.2.1	13.2.2	13.2.3	13.2.4	13.2.5	13.2.6	13.2.7	13.2.8	13.2.9	13.3.1	13.3.2
